

Karmelle Liquid Filling Machines are built to the highest standard. Our breadth of knowledge and experience within the industry ensures that we consider every aspect of your filling needs and we select the best quality components, fittings and materials to build and produce machinery at our factory in Yorkshire.

Our standard range of **filling machines** includes:

**Automatic**

Karmelle offers various types of automatic filling machines. All automatic filling machines are modular and more filling heads can be added if you product increases. We also offer a one litre to five litre volumetric filler with independently controlled cylinders when considering your specific needs.

- Flowmeter
- In-line VIP F100-Atex
- Volumetric F100 & F500

**Semi-automatic Fillers**

Karmelle semi-automatic filling machines offer a variety of filling options for small to medium batch sizes. The Bench Top Filler is suited to small volumes and batch sizes. For slightly larger volumes and batches we offer single or twin head volumetric machines. For larger volumes and handling the Boom Arm Filler is an ideal solution. Our friendly and knowledgeable staff will be glad to assist you in order to determine the best way forward.
